

Design Terminal ESA BIC Hungary

Are you interested in the space industry?

We, at Design Terminal, are waiting for your application for the ESA BIC Hungary Incubation Program!

What is the program about?

The main goal of ESA BIC Hungary is to develop successful startups connected to space industry and to create and strengthen a community in the industry in Hungary.

What will you get?

-  Technical support and business mentoring
-  Up to € 50,000 zero equity funding
-  Office accommodation
-  Legal and intellectual property consultation
-  Access to the local and ESA international space community

Who can apply?

You have a startup, which legal entity is located in Hungary or you are willing to register it in Hungary by the time the contract is signed

The applicant is the majority owner of the company

Your company is not older than 5 years

Your product, process or service is based on a new technological invention or a new application of existing technology:

- exploitation of space technology, use of knowledge in the space domain;
- utilization of space systems and space-based services in non-space markets;
- addressing any part of the space value chain.

Application deadline: 18th September 2023 EOD

Application steps:

- Download and fill out the documents from the **website**,
- Join our **Open Day** on 18th August, Friday for direct insights and consultation on your application
- Submit your application by 18th September, Monday EOD
