

Design Terminal ESA BIC Hungary

Who are we?

As Central Europe's leading innovation agency, Design Terminal builds "Innovation Champions" through corporate partnerships and talent acceleration programs.

What is ESA BIC Hungary?

The main goal of ESA BIC Hungary is to develop successful startups connected to space industry and to create and strengthen a community in the industry in Hungary.

Whom is this incubation program for?

You can apply as a startup or a natural person fulfilling the following conditions:

- your company is registered in Hungary or you have the availability to locate your company in Hungary;
- the majority of the company shares do not belong to another company (or companies);
- your company is not older than 5 years;
- as a natural person/team, you must commit to register your business before the incubation contract starts.

Your suggested product, processes or service is based on a new technological invention or a new application of existing technology with a valid space connection.

What will you get during the incubation?

A comprehensive package of support services including office accommodation, equity free incentive funding (50k€ max), technical support, business coaching and legal/ IPR advice.

Program duration: 12-24 months
